Fluoroscopy Certification Course for RNs and PAs!

Continuing Education Professionals* is pleased to announce our presentation of the State of Texas mandated training for RNs and PAs qualifying you to perform fluoroscopic procedures under the direction and supervision of a physician.

“Does your ASC need more trained, qualified and certified operators of the fluoroscopy unit? Do you need a back up c-arm operator?”

The **Fluoroscopy Certification Course for RNs and PAs** can provide your center with additional qualified and certified operators of the fluoroscopy devices and can free you from costly contract operators that are often difficult to find or not skilled in the procedures performed at your facility.

The State mandated curriculum for the **Fluoroscopy Certification Course for RNs and PAs** consists of **ten classroom hours** of radiation safety and protection for the patient, self, and others, **ten classroom hours** of radiation equipment operation including maintenance and regulations training, **ten classroom hours** of image production and evaluation in fluoroscopy and **two classroom hours** of operation of fluoroscopic devices in the specialized setting.

Breakdown of training time: Most surgical centers prefer to do the training over a long weekend, Friday, Saturday and Sunday or Saturday, Sunday, and Monday.

Classes dates and times: At your convenience...contact me for dates available including weekdays available also.

Location: At your facility using your equipment for greatest competency and shortest learning curve.

Ray Villarreal BSRT, RT(R)(QM) the program director and instructor will make certain that the information presented not only meets the State requirement but is also relevant and applicable for the type of fluoroscopic work you need to perform. Ray has extensive experience with both the operation of fluoroscopy devices and use of fluoroscopy for orthopedic, pain management, urology and surgical procedures. This training course will qualify your RNs and PAs to operate the device safely, meet State certification, and feel confident in the procedures you do. Mr. Villarreal has trained more RN and PA operators of fluoroscopy devices than any other training provider in the State.

*registered as TP004 NCT training provider in the State of Texas

For more information and to read the State Regulation that permits this training, please go to: [Title 25 Texas Administrative Code, Chapter 140](#) and specifically section 517.

For tuition, class date, and payment method questions, please call Ray Villarreal at 214 684 6285 or email ray@cepro.org with any questions.
